

Dear Hiring Manager,

I am writing to express my interest in the Data Engineer position at Inetum Colombia. I hold a background in Computer Science and Engineering, with a strong focus on data engineering, software development, and artificial intelligence. Currently, I work as a Software Engineer, where I design and build scalable, data-driven systems with an emphasis on reliability and performance.

In my professional experience, I have worked extensively with Python and SQL for data manipulation and processing, as well as designing ETL pipelines that ensure data quality, consistency, and usability. I have experience working with relational and non-relational databases, and I am familiar with distributed data processing concepts, including the use of tools such as Apache Spark for handling large-scale datasets.

Additionally, I have developed data workflows that incorporate data cleaning, transformation, and validation processes, aligning with best practices in data governance and data quality assurance. My background in data science further strengthens my ability to understand data from both an engineering and analytical perspective, enabling me to build solutions that are not only technically sound but also valuable for business decision-making.

What differentiates me is my strong systems-oriented mindset and my focus on building production-ready solutions. I prioritize scalability, maintainability, and robustness, ensuring that data pipelines and systems perform reliably under real-world conditions.

I am particularly interested in Inetum due to its strong presence in digital transformation and its focus on delivering high-impact technological solutions across industries. I am motivated by the opportunity to contribute to projects that require handling large volumes of data with high standards of quality and integrity, especially in sectors such as banking and fintech.

I would welcome the opportunity to contribute to your team and discuss how my skills and experience align with Inetum's goals.

Thank you for your time and consideration.

Sincerely,
Juan José
