

Dear Hiring Manager,

I am writing to express my interest in the Data Engineer position at VASS. I hold a background in Computer Science and Engineering, with a strong focus on data engineering, software development, and data-driven systems. Currently, I work as a Software Engineer, where I design and build scalable solutions with an emphasis on data processing, reliability, and performance.

In my experience, I have worked extensively with Python and SQL to build and support data pipelines, including data extraction, transformation, and validation processes. I have experience working with relational databases and handling data workflows that ensure consistency and quality across different stages of processing.

Additionally, I am familiar with cloud-based data architectures, particularly in AWS environments, including services such as Amazon S3 for data storage and tools for data processing and querying. I have worked on structuring and managing data flows aligned with data lake concepts, ensuring that data is accessible, reliable, and ready for analytical use.

I have also supported monitoring and troubleshooting of data processes, identifying issues, validating data quality, and ensuring stability in operational environments. I am comfortable working under defined architectural guidelines and collaborating with senior engineers to continuously improve data workflows.

What differentiates me is my strong engineering mindset combined with a focus on data quality and operational reliability. I approach data systems not only from a technical perspective but also considering their impact on downstream analytics and business processes.

I am particularly interested in VASS due to its strong focus on digital transformation and its use of modern cloud-based data platforms. I am motivated by the opportunity to contribute to scalable data solutions while continuing to grow within a structured and high-impact engineering environment.

I would welcome the opportunity to contribute to your team and discuss how my background aligns with your needs.

Thank you for your time and consideration.

Sincerely,
Juan José
